pais	country
--	All data are copyrighted by the Latin American Public Opinion Project (LAPOP) and may only be used with the explicit written permission of LAPOP, normally via a license or repository agreement (see our web page for instructions, www.LapopSurveys.org). Data sets may never be disseminated to third parties.
--	All data are deidentified and regulated by the Institutional Review Board (IRB) of Vanderbilt University. They may be used only by those who have fulfilled all IRB requirements.
--	Important note: This data set contains a variable called <i>WT</i> which should be activated to produce representative national results. The weight variable can be activated through the svy setting: <code>svyset upm [pw=wt], strata (estratopri)</code> . In this case, all STATA commands should use the pre-fix svy (for example <code>svy: mean q2</code> or <code>svy: tab etid ur</code>).
--	Another way to activate the weight in STATA is to specify the weight variable for each command. We recommend to use <code>iweight</code> when running frequency distributions, for example, <code>tab q1 [iw=wt]</code> .
--	For more information and details about the sample design, please consult the technical and country reports through a link on the LAPOP website: www.AmericasBarometer.org .
