Continuum of Prevention, Care and Treatment of HIV/AIDS for Most-at-Risk Populations (CHAMP)

Female Sex Workers performing as counselors during an HIV Testing & Counseling campaign.

Goal: Use a “continuum of care” approach to service provision, linking individuals and their families to community and facility-based interventions

Life of Program:

April 2014 – April 2019

Total USAID Funding:

U.S. \$18.8 million

Geographic Focus:

Cameroon

Implementing Partner:

CARE International

Program Description:

CHAMP improves and expands HIV/AIDS services for key populations (commercial sex workers and men who have sex with men) and other vulnerable populations such as long distance truck drivers.

Program Objectives:

- Increase the technical competence of partners in key populations program design and management using the Continuum of Prevention, Care and Treatment (CoPCT) approach.
- Strengthen the enabling environment for HIV/AIDS programming for key populations.
- Ensure quality assurance/improvement and monitoring and evaluation systems are incorporated in CoPCT.

Expected Results:

- Community-based Centers of Excellence that model interventions for key populations HIV services will be developed and strengthened.
- Mobile clinical services for key populations will be supported and expanded.
- The organizational capacity of key populations community-based organizations will be developed and strengthened.
- The local policy environment for key populations programming will be improved.
- Communities will be mobilized to expand CoPCT services.
- Quality assurance/improvement models will be established and institutionalized for sustainability.
- Monitoring and evaluation systems will be strengthened.
